Ciralight Global, Inc. (OTC:DB:CGHA) maker of [Ciralight SunTrackers](#), a solar powered, energy efficient lighting solution for commercial buildings, announced today that it has received the prestigious Green Mark certification from the Singapore Green Building Council endorsed by the government of Singapore.

Gary and Kammy Choo of GreenTree Products Asia Pte, LTD., Ciralight's exclusive distributor for Singapore, Malaysia and portions of Indonesia, secured the Singapore Green Building Council certification. The certification is based on the SunTrackers capability to bring abundant, consistent natural sunlight into building interiors throughout the day; and Ciralight Global's commitment to environmental practices throughout their own operations.

Ciralight SunTrackers use [advanced GPS Suntracking Technology](#) and Mirrors to illuminate commercial buildings. They are better for the Environment, Better for Business and Better for people. Ciralight SunTrackers have been installed at Airports, Schools, retail stores, offices, warehouses, and factories.

The Green Mark Certification allows Singapore building owners that install Ciralight SunTrackers to benefit from incentive programs and grants set up by the Singapore government to encourage green-mindedness. As importantly, installation of the Ciralight SunTrackers can help property owners obtain a BCA Green Mark for their building, a meaningful distinction in the Singapore real estate market.

Gary Choo, the Managing Director of GreenTree Products Pte, Ltd. stated "With our local inventory, technical support, and experienced installers, we were already seeing strong interest and demand. Now, with the Singapore Green Mark certification, customers understand that Ciralight SunTrackers are endorsed as an environmentally approved product."

Jeff Brain, CEO of Ciralight Global said, "We are very thrilled to receive this Green Mark Certification. It is one more step in our goal of making Ciralight SunTrackers™ a global sustainable lighting solution that will allow millions of people around the world enjoy natural, healthier, clean energy efficient lighting."

Installations of Ciralight SunTrackers™ have been completed at Indonesian warehouses, Singapore Hawker Centers, at the Singapore International Airport and at one of the island's largest food companies. With the Green Mark certification, 2012 looks to be a prominent year for GreenTree Products Asia and Ciralight SunTrackers. Ciralight SunTrackers™ have also been installed throughout world by Whole Foods, Staples, Office Depot, Boeing, Google, Caterpillar, LG, IKEA, Walgreens, Ace Hardware, Eaton, Fresh & Easy, Frito Lay, Patagonia and more.

### Background:

The BCA Green Mark program was launched in January 2005 as a way to encourage Singapore's construction industry towards building environmentally friendly buildings. It is intended to promote sustainable solutions and raise environmental awareness among developers, designers and builders.

Please contact <http://www.greentree-products.com> or <http://www.ciralight.com> to discuss how we might be able to help you achieve your energy conservation and cost-saving goals.
